

Mechanics in Writing!

Writing mechanics refer to the technical aspects of writing, ensuring clarity, coherence, and effectiveness. Here are key mechanics to master:

Grammar

1. Verb tenses (past, present, future)
2. Subject-verb agreement
3. Pronoun usage (e.g., who/whom, its/it's)
4. Clause structure (independent, dependent)
5. Sentence types (simple, compound, complex)

Punctuation

1. Commas (separating items, clauses)
2. Semicolons (joining independent clauses)
3. Colons (introducing lists, explanations)
4. Apostrophes (possessive nouns, contractions)
5. Quotation marks (dialogue, quotes)

Spelling and Capitalization

1. Word spelling (correct usage)
2. Capitalization (proper nouns, titles)
3. Abbreviations (e.g., acronyms, initialisms)

Syntax and Sentence Structure

1. Sentence length and variety
2. Active and passive voice
3. Parallel structure
4. Modifiers (adjectives, adverbs)
5. Clause and phrase arrangement

Style and Tone

1. Formal and informal tone
2. Audience consideration
3. Purpose and intent
4. Point of view (first person, third person)
5. Figurative language (metaphors, similes)

Common Errors to Avoid

1. Fragments and run-on sentences
2. Misused words (e.g., affect/effect, accept/except)
3. Lack of subject-verb agreement
4. Inconsistent verb tense
5. Overuse of adverbs
