

Word of two Syllables Stressed on the first and Second Syllables

A stressed syllable is one that is said with more energy than an unstressed one. In other words, stress is emphasis placed on a syllable. In English, word stress is super important for clear pronunciation and understanding.

A syllable is a unit of pronunciation that typically contains a vowel sound. Examples: Cat, table, before, computer etc.

However, stress is marked by placing an acute accent over the vowel of the stressed syllable.

Let's look for words which are stressed on the first syllable:-

BETter	/ˈbetər/
MATter	/ˈmætər/
PERmit	/pɪˈmɪt/
DOctor	/ˈdɒktər/
SURvey	/ˈsɪvər/

Structure: Phrases and its types.

Phrases are groups of words acting as a single unit in a sentence, classified by their main word (head) and function with common types.

A phrase is a group of words that forms a grammatical component. It can be used to communicate something. It is a part of a sentence and cannot stand on its own. Phrases provide more information about whatever the sentence is speaking about.

Types of phrases

In English grammar, there are five main types of phrases. They are: Noun phrase, Adjective phrase, Adverb phrase, Verb phrase, prepositional phrase. Other types of phrases include: gerund phrase, appositive phrase, participle phrase and infinitive phrase.

Continuous Writing: Debate

Debate is a process that involves formal discourse discussion, and oral addresses on a particular collection of topics often with a moderator and an audience. In a debate, arguments are put forward for opposing viewpoints.

Steps in a debate

1. Introduction: Express your message and why it is important to your audience, as well as yourself.
2. Statement of fact: Break down the general thesis of your argument into smaller parts.
3. Confirmation or proof
4. Refutation
5. Conclusion
