

INTONATION PATTERN (RISING TONE)

Intonation pattern refers to the pattern of changes that take place during speech production.

It is also the variation in the pitch of the voice.

FUNCTION OF INTONATION PATTERN

1. The grammatical function: This is the ability of voice pitch to indicate to a listener the grammatical classification of an utterances.
2. The attitudinal function: This convey to the listener information relating to the speaker's Intonation might reveal surprise, doubts or warmth.

USES OF RISING TONE

The rising tone is use for the following:

1. Simple polite request: e.g

-please sit down.

- A minute of your time please.

2. Simple greetings. E.g

-good morning.

-hello

- 3.Question that requires yes or no. E.g

- must you go with them?

-do you like apple?

- 4.Imcomplete statement: e.g

- As soon as the rains,stops, I 'll....

- African countries need to

- 5.Listing items:eg

-She bought carrot, pepper,peas,beans and cabbage.

6. Express surprise e.g

- wow!

What a great idea!.
